

COVID-19 Pandemic 'n' Wave n = 3, 4, ...?

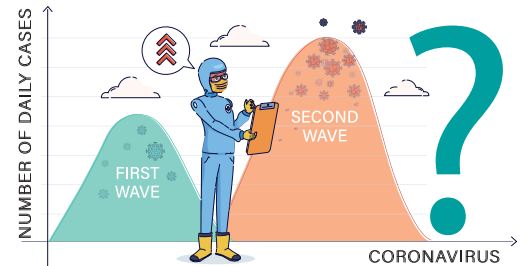

The possibility of a third wave, or maybe even a fourth or fifth wave - its occurrence, timing and severity are difficult for even epidemiologists and disease modellers to predict.

Daily new confirmed COVID-19 cases per million people

Shown is the rolling 7-day average. The number of confirmed cases is lower than the number of actual cases; the main reason for that is limited testing.

When everything is uncertain, what is certain?

COVID Appropriate Behaviour + Vaccination works!
To keep you and your loved ones safe from severe disease and death.

What lowers your risk from COVID-19?

BE WISE, FOLLOW THIS ADVICE!

Combine these precautions:

Wear a mask

Clean your hands regularly with soap and water

Keep physical distance from others

Cough/sneeze away into your elbow

Open windows as much as possible

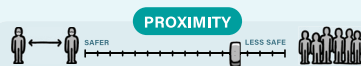

Get vaccinated once it's your turn!

Life is all about choice! You can choose to stay safe!

3 FACTORS TO HELP YOU MAKE SAFER CHOICES

Open air spaces safer than enclosed spaces

Farther away from others safer than close together

Shorter time periods with others are safer

KNOW YOUR RISK. LOWER YOUR RISK.
