The New Normal in 2021

We have seen the first wave, and then the second wave, and are anticipating more waves going ahead.

As nations and regions begin the process of ‘Unlocking’ in response to the ebbing of the wave, you have to make your own decisions to keep yourself and your loved ones safe.

1. Crowds & Crowded Places
   - With many people around you

2. Close Conversations and Contacts
   - Keep that physical distance

3. Confined and Closed Spaces
   - With limited ventilation

The risk is higher in places where these factors overlap.

Even as restrictions are lifted, consider where you are going and Stay Safe by avoiding the three C’s.

COVID Appropriate Behaviour Works!

- Avoid crowded places and limit your time in enclosed spaces
- Maintain at least 2 m distance from others
- Keep hands clean and cover coughs and sneezes
- When possible, open windows and doors for ventilation
