“What advances a nation or a community is not so much to prop up its weakest and most helpless members, but to lift up the best and the most gifted, so as to make them of the greatest service to the country.”

Setting up of Nation Building Continues
While there is no denying the power of individual thought—the immense capacity of a single person to envision change on a grand scale—it is only through the power of community that we can realise our collective vision of building an equitable and inclusive future.

For over a century now, the Trusts have endeavoured to achieve lasting positive change in the lives of many, especially those subsisting on the margins. These efforts are at the heart of our core philosophy to use philanthropy as an instrument for social transformation.
